EDUCATION

Pan-Atlantic University – Ibeju-Lekki, Lagos

Bachelor of Science in Computer Science

GPA: 4.73/5.0 (First Class Honours, on 5.0 scale)

Relevant coursework: Mathematical Methods, Operating Systems, Compiler Constructions, Computer Programming, Numerical Analysis, Linear Algebra, Discrete Structures

International School, University of Lagos (UNILAG) – Akoka, Lagos

December 2020

EXPERIENCE

Ernst & Young (E&Y) – Risk Consulting Intern, Digital Risk | Lagos, Nigeria July 2025 – September 2025

- Assisted in Enterprise Level Controls (ELC) reviews and IT risk documentation for clients in the energy and financial services sectors, improving the accuracy and completeness of control assessments.
- Conducted IT control testing in change management, access management, and backup processes, with findings adopted by the engagement team to strengthen client risk evaluations and financial oversight.
- Prepared audit documentation and walkthrough records, ensuring supervisor approval and compliance with firm and regulatory standards.

Uni Ordering – Co-Founder & Frontend Developer | Lagos, Nigeria January 2025 – Present

- Co-founded a food ordering startup serving 1,000+ students, processing 30–40 daily orders and providing a scalable solution.
- Led frontend development, creating a responsive, user-friendly interface that drove adoption and enhanced order efficiency.
- Managed daily operations and contributed to product design, combining technical expertise with business decision-making to sustain platform growth.

Unyte Africa - Frontend Development Intern | Lagos, Nigeria July 2024 – September 2024

- Built scalable React Interfaces with reusable components, implementing pagination, search and filter functionality to enhance data management and user experience.
- Collaborated with cross-functional teams to align user interface designs with business requirements, ensuring timely project delivery using agile development practices.
- Optimized performance for rendering large datasets by integrating external APIs and leveraging advanced react techniques for faster load times.

PROJECTS

PAU knowledge Assistant – AI knowledge Base | Pan-Atlantic University ICT Team

- Collaborated with the PAU ICT Team to deploy an **AI-powered assistant** using Microsoft Copilot Studio
- Structured and formatted data into Markdown knowledge modules supporting 700 + students annually.

Eagle – Vessel Tracking & Risk Management System | Team of 6

- Designed database and API architecture for **Keystone Bank's vessel-tracking solution**, integrating AIS data.
- Enabled real-time risk visibility for bank-owned assets through data-driven insights.

SKILLS

- **Frontend:** JavaScript(ES6+) , HTML5, CSS3, JavaScript (ES6+), React.js, TypeScript, Redux, Context API, Tailwind CSS
- **Backend:** Node.js, NestJS
- **Tools/software:** Git, Docker, Firebase, VS Code
- Excellent written and verbal skills
- Other: Strong problem-solving, Critical-thinking, Collaboration, Written & Verbal Communication.
